

# ACCESSIBILITY FOR YOUR HOME

**Aritco HomeLift Access**  
Product catalogue  
2021

## Aritco aims to make home lifts a natural part of people's everyday lives.

We believe that the definition of a modern home will change – that modern homes and contemporary living will include home lifts. Our journey started 25 years ago, with the simple idea of improving mobility everywhere. Today, Aritco lifts can be found in over 35,000 buildings and private homes around the world.

Simplicity, quality and innovation are the hallmarks of all Aritco's activities. We are constantly seeking new ways to improve the quality, design and user-friendliness of our

products, as well as our environmental impact. Safety and reliability are top priorities, and we follow Europe's strictest quality and safety standards.

All Aritco lifts are developed and produced in Stockholm, Sweden, and we are proud to maintain the highest level of quality in all stages of the process, from design through to final installation in your home.

This catalogue is primarily made for all our partners around the world. The purpose is to show what Aritco can offer in terms of products, options and possible combinations.

Due to continuous product development, all specifications included in this catalogue are subject to change without prior notice. Reservations are made regarding misprints and articles being out of stock.

# PRODUCT SUMMARY

Aritco HomeLift Access is designed to give access to all parts of your house for both you and your family as well as your friends. Practical and smart with sizes for all needs. With an option to personalize it with details such as glass walls, a range of various colors and different materials.

<b>Type of lift:</b>	Home lift intended for installation in private homes. Only to be used in buildings without public access.
<b>Technical compliance:</b>	European Machine directive 2006/42/EC European standard EN 81-41
<b>Drive system:</b>	Patented screw/nut system
<b>Rated speed:</b>	Max 0,15 m/s Max 0,25 m/s <sup>1)</sup>
<b>Travel height:</b>	250 -13 000 <sup>2)</sup> mm
<b>Number of stops:</b>	Max. 6 stops per lift
<b>Number of doors:</b>	Max. 6 doors per lift
<b>Number of doors per floor:</b>	Max. 2 doors per floor
<b>Pit:</b>	50 mm (no pit is required when there is a threshold/ramp)
<b>Top height:</b>	Minimum 2240 mm. Maximum 4000 mm. (1100-1600 mm with half height door)
<b>Platform control:</b>	"Hold to run", the destination button must be kept pressed down during the whole ride <sup>3)</sup>
<b>Landing control (on door):</b>	One-touch call
<b>Environment:</b>	Indoor/Outdoor
<b>Emergency lowering:</b>	Battery operated emergency lowering
<b>Control voltage:</b>	24V
<b>Motor:</b>	2,2kW (3kW for higher speed)
<b>Locking system:</b>	Electrical
<b>Power supply:</b>	1-phase 230V 50 Hz/16 A/16 A slow 3-phase 230V 50 Hz/9 A/16 A slow 3-phase 400V 50 Hz/5.2 A/16 A slow
<b>Rated load:</b>	250, 410 or 500 kg (depending on platform size)

- 1 ) For installations outside Europe: As option for lifts with 400 V 3-phase.
- 2 ) Travel height when having a half door is maximum 3000 mm.
- 3 ) For installations outside Europe one-touch operation is available.

# Aritco HomeLift Access

# LIFT SIZE

**900 x 1040**

**Carrier size:** 900 x 1040  
**External dim.:** 1300 x 1160  
**Rated load:** 250 kg / 2 persons  
**Wheelchair:** -

**900 x 1280**

**Carrier size:** 900 x 1280  
**External dim.:** 1300 x 1400  
**Rated load:** 410 kg / 5 persons  
**Wheelchair:** Lone user or type A\*

**900 x 1480**

**Carrier size:** 900 x 1480  
**External dim.:** 1300 x 1600  
**Rated load:** 410 kg / 5 persons  
**Wheelchair:** A or B with attendant\*

(mm)

Aritco HomeLift Access is available in 8 different platform sizes. The rated load depends on the platform size.

**Carrier size:** Inner dimensions of the lift  
**External dimensions:** Outer dimensions of the lift (shaft size)

For detailed drawings see page 34.

### 1000 x 1280

**Carrier size:** 1000 x 1280

# LIFT SIZES

**1100 x 1580**

**Carrier size:** 1100 x 1580  
**External dim.:** 1500 x 1700  
**Rated load:** 500 kg / 6 persons  
**Wheelchair:** A or B with attendant, adjacent entry\*

**1000 x 1980**

**Carrier size:** 1000 x 1980  
**External dim.:** 1400 x 2100  
**Rated load:** 500 kg / 6 persons  
**Wheelchair:** A or B with attendant\*

(mm)

\* Aritco HomeLift Access follows the requirements stated for lifts regarding the possibility to fit a wheelchair with or without attendant. National guidelines may apply.

Depending on the size of the platform you can fit either a wheelchair or a wheelchair with an attendant.

Type A and B wheelchairs are defined in :

- EN 12183 Manual wheelchairs – requirements and test methods
- EN 12184 Electrically powered wheelchairs, scooters and their charges – Requirements and test methods

Dimensions of wheelchair	Class A	Class B
Total length	1200	1400
Total width	700	700

EN81-41 and EN81-70 defines the sizes of the platform and what type of wheelchair it is intended for.

# LIFT COLOR

Aritco HomeLift Access can be painted in any RAL color from the Chart K7 classic chart (except for pearl and fluoridating colors\*).

Aritco HomeLift Access is painted in Traffic White, RAL 9016, as standard. The paint is a soft-textured powder coat with a matt surface (gloss level 12).

Door handles and handrail are painted in colors that shall protect them from wear and tear. The white color is RAL 9016, with gloss level 70

and without texture. The grey color looks like aluminum and is the anodic color Natura with gloss level 20 and without texture.

The entire lift can be ordered in another color as an option. It is also possible to order only the doors or walls in a different color. When another color is chosen for the doors, all the doors will be supplied in the same color.

Common colors, see page 11, have shorter lead time and lower price. The rest of the colors from RAL chart K7 classic have longer lead time and higher price.

## Standard:

The whole lift painted in standard color RAL 9016 (Traffic white). Door handles in grey as standard, can be ordered in RAL 9016 (Traffic white) as option. Handrail in RAL 9016 (Traffic white).

## Full color option:

The whole lift painted in optional color (Incl. shaft, doors and the panels around and under the control panel.) Door handles in grey. Handrail in grey.

## Lift partially painted in different colors:

- Lift walls/Shaft in one color
- All door blades in one color
- All door frames in one color
- Panels around and under the control panel in one color
- One of the above choices or a combination of them

Door handles in grey as standard, can be ordered in RAL 9016 (Traffic white) as option for lift with door blades in RAL 9016 (Traffic white). Handrail in RAL 9016 (Traffic white) as standard, if platform is painted in another color the handrail is grey.

may differ from the color samples  
pictured above.

- \* Any RAL color means in this case any RAL color from the 213 color RAL chart K7 classic except the following colors that are not available;  
Fluoridating colors: RAL 1026, 2005, 2007, 3024, 3026, 6038  
Pearl Colors: RAL 1035, 1036, 2013, 3032, 3033, 4011, 4012, 5025, 5026, 6035, 6036, 7048, 8029, 9022, 9023

# CARRIER

The platform is in its basic execution delivered with a side wall (half height) including the control panel.

Used for lifts with an open shaft, half height doors or when cost must be kept down. Height 1100 mm. Panels around and under the control panel are painted in RAL 9016 (Traffic white) as standard, but can be painted in any RAL color as an option.

## FULL HEIGHT WALL

To get a conventional lift feeling the Aritco HomeLift Access can be delivered with a full height wall (2100 mm high) as an option. The full height wall has a big mirror that goes along the whole machine side. The mirror has an integrated LED light. Included as standard for full height wall. Panels around and under the control panel are painted in RAL 9016 (Traffic white) as standard, but can be painted in any RAL color as an option. The full height wall is available for platform sizes with machine side 1040, 1280 and 1480 mm. When ordering a full height wall for platform 900 x 1040 mm, the electrical cabinet must be external.

## FOLD DOWN SEAT

In solid birch and with chromed brackets. The seat has to be folded back manually after use. Can be ordered as an option. Size: 320 x 400 mm. Not available for 900x1040.

# FLOOR

Vinyl or PVC flooring. Choose between the following options.

It is also possible to order the lift without a flooring, which enables the homeowner to choose and fit their own flooring. The maximum thickness of an externally selected floor is 3 mm.

**Dark Grey Vinyl**  
Standard

**Light Grey Vinyl**

**Bolon Graphic Gradient**  
Option

**Bolon Flow Stream**  
Option

# CONTROL PANEL

The control panel is delivered with a light box, with an acrylic glass that is lit with LED light.

The destination buttons, emergency stop button, alarm button, autodialer (option), landing indicator (option), max weight and number of persons allowed are located on an aluminum panel. Parts around the light box and aluminum panel are painted in grey, anodic color Natura, that looks like aluminum.

For Aritco HomeLift Access you can choose between two different control panels;

- Control panel – Home version
- Control panel - Accessibility version (option)

## LANDING INDICATOR

A digital display positioned at the control panel. It shows which floor the lift is on at the moment. The indicator can also be fitted with a voice announcer available in Danish, Dutch, English, Finnish, French, German, Norwegian, Polish, Russian and Swedish.

Voice: Basement, Ground floor, Floor 1-6.

The landing indicator can also show information from the system:

- Warning if the batteries are low.
- A bell when the alarm button has been pressed.
- Number of starts and total run time since installation or since last reset.
- A weight symbol will appear if the lift is overloaded.
- If connected to the buildings fire alarm a "Fire" symbol will be shown when alarm is activated.

Can be ordered as an option.

## ALARM BUTTON

A standard alarm button is always delivered with the lift. When it is pressed a buzzer sounds. This is only a signal to the user that the button is pressed. The alarm button may be connected to an external alarm sounder or an autodialer. The alarm button is standard.

## EXTERNAL ALARM SOUNDER

An external alarm sounder mounted outside the lift. It is connected to the alarm button and when

the alarm button is pressed the external alarm sounder will give a loud signal outside the lift to attract attention in case of emergency. Can be ordered as an option.

## EMERGENCY STOP BUTTON

A button in "mushroom" type for emergency situations. Light indicates if it is pressed down or not. Is always included as standard.

## HANDRAIL

A handrail is mandatory according to EN81-41 and delivered as a standard. Height of handrail is 875 mm from the platform floor. The ends of the handrail are closed and turned to the platform. The handrail is made of aluminum with zinc corners and are painted in RAL 9016 (traffic white) as standard. When platform is ordered in another color than standard the handrail will be painted in grey, Anodic color Natura, that looks like aluminum. It is the same color as is used for the details around the control panel. Both the grey and white handrails will have a glossy surface to protect them from wear and tear and from getting dirty.

In the handrail there is an integrated LED light, that gives light on the floor (50 LUX).

ix5 | 410 kg

Made in Sweden

### CONTROL PANEL - HOME VERSION

Standard control panel for Aritco HomeLift Access is with 32 mm blank destination buttons. As identification for each floor an own text (max 10 signs) is written directly on the control panel. The touch plate of the buttons is neutral/flat and in

matted stainless steel.

6 buttons/floors possible for all combinations, except for when having landing indicator and key lock on the control panel, then 5 buttons/floors are possible.

### KEY SWITCH ON PLATFORM

A key switch placed on control panel. The key switch locks the platform functions and prohibits unauthorized use. One key switch per platform can be provided. The key switch can be serial connected to all destination buttons or the key switch is connected to one destination button. Two brands to choose from:

- ASSA (Nordic markets only). Aritco only delivers the housing, Aritco does not deliver the locking cylinder.
- Telemecanique

Can be ordered as option.

### CONTROL PANEL - ACCESSIBILITY VERSION

The optional control panel for Aritco HomeLift Access is with 32 mm large buttons with text/numbers and braille. Following buttons are available: -2, -1, 0, 1, 2, 3, 4, 5, 6, 0A, 0B, 1A, 1B, 2A, 2B, 3A, 3B, BG, E, G, K, U, B

Destination buttons are according to EN 81-41 for disabled. The location of the buttons is within the limits in the standard, i.e. height between platform floor and the center line of the buttons is between 900-1100 mm. The touch plate of the buttons is in aluminum, black anodized (AlMg3 EV6). Text/number embossed. Height of text/number 15 mm. With Braille.

6 buttons/floors possible for all combinations, except for when having landing indicator and key lock on the control panel, then 5 buttons/floors are possible.

A green ring, indicating the exit floor can selected on one of the destination buttons (max one per lift). The green ring is included as standard.

# DOORS

The landing doors installed at each landing are made of galvanized steel and laminated and toughened glass, 8 mm thick.

All doors are painted in RAL 9016 (Traffic white) but can be painted in any RAL color as an option. The door frame and door blade can be painted in same color or the frame in one color and the blade in another color. For the same lift all doors must be painted in the same color.

A glassed area according to EN81-41 is standard for all doors. Standard is with clear glass (JT0). Optional is to have tinted glass (JT16).

The profiles around the door glass are as standard aluminum. For large glass doors and half height doors they can be painted in the same color as the door blade.

All doors can be left- or right hinged. Doors are always delivered with door frame. It is not possible to order the door or the frame separately.

**Clear glass**  
(JT0)

**Tinted glass**  
(JT16)

**Large glass door**

**Double hinged glass door**

**Half height door**

**EI60 - Fire & smoke proof door**

## LARGE GLASS DOOR

Large glass door with one glass window.

**Opening widths:** 800, 900 mm

**Opening heights:** 1800, 1900, 2000, 2100 mm

The actual height of the door is 40 mm higher since a plate that covers the joint between the door and the frame is mounted on the door.

**Glass window (vision):** 612x1472 mm (800 mm wide door), 712x1472 mm (900 mm wide door)

**Standard:** Door blade and door frame in RAL 9016 (Traffic white). Glass window: clear glass (JT0). Aluminum door glass profiles.

**Options:** Door blade and /or door frame in other RAL color. Glass window: tinted (JT16). Painted door glass profiles.

Door opening width	Door opening height	Available for B-side	Available for A/C-side
800	1800 / 1900 2000	1040	900
900	1800 / 1900 2000 / 2100	1280 / 1480 1580	1000 1100

(mm)

## DOUBLE-HINGED GLASS DOOR

Double hinged glass doors are made of 17,5 mm laminated glass and always delivered with two internal door openers which opens the doors automatically. If the space in front of the door is limited it is a good solution to use the double hinged glass door.

**Opening widths:** 800, 900 mm

**Opening heights:** 2000 mm

The actual height of the door is 40 mm higher since a plate that covers the joint between the door and the frame is mounted on the door

**Door blade:** Two blades, 400 or 450 mm wide.

**Glass window (vision):** Two glasses, 332 x 1950 mm or 394 x 1950 mm.

**Standard:** Door blade and door frame in RAL 9016 (Traffic white). Glass window: clear glass (JT0)

**Options:** Door blade and /or door frame in other RAL color. Glass window: tinted (JT16)

Door opening width	Door opening height	Available for B-side	Available for A/C-side
800	2000	1040	900
900	2000	-	1000 / 1100

(mm)

## HALF HEIGHT DOOR WITH GLASS

Half height door with one glass window. If you require an open shaft or if the head space is low, the use of a half height door may be a good solution. According to EN81-41 the half height door is only allowed for lifts with a travel height up to 3 meters (within Europe). The half height door can not be combined with EI60 fire & smoke proof doors. Note that when using a half height door 1100-1600 mm the shaft and the half height door will end at the same height. It is not possible to have a higher shaft than the half door.

**Opening widths:** 800, 900 mm

**Opening heights:** 1100-1600 mm

**Glass window (vision):** 612x670 mm (800 mm wide door), 712x670 mm (900 mm wide door)

**Standard:** Door blade and door frame in RAL 9016 (Traffic white). Glass window: clear glass (JT0). Aluminum door glass profiles.

**Options:** Door blade and /or door frame in other RAL color. Glass window: tinted (JT16). Painted door glass profiles.

Door opening width	Door opening height	Available for B-side	Available for A/C-side
800	1100 1101-1600 <sup>1)</sup>	1040	900
900	1100 1101-1600 <sup>1)</sup>	1280 1480	1000 1100

(mm)

<sup>1)</sup> Custom height

Note: For platform size 900x1040 mm, the electrical cabinet is placed on top of the mast. The machine side is 200 mm higher than the rest of the shaft.

A half height door can be used in the following cases:

- 1100 mm high half height door: When you have an open shaft and a top height of 1100 mm (even shaft).
- 1101-1600 mm high half height door: When you have a low travel height with a standard door on the bottom floor and a custom height half height door is needed to get an even shaft (see page 16 for details).

When you have a higher travel height, but a standard door on second top floor and a custom height half door is needed to get an even shaft.

It is not possible to have a lower half height door than the top height of the shaft – this means that you can't have a 1100 mm height door on a lift with shaft height of for example 1400 mm.

Note that it is not possible to have two half height doors on the same lift.

# DOORS

## TRAVEL HEIGHTS

When using a customised height half door, consider the following criteria regarding travel height. Note that the travel height is depending on if the lift is installed with or without a pit.

For large glass doors:

Door opening height <sup>1)</sup>	Travel height when a ramp on first level	Travel height with a pit on first level
1800	490 - 990	440 - 940
1900	590 - 1090	540 - 1040
2000	690 - 1190	640 - 1140
2100	790 - 1290	740 - 1240

<sup>1)</sup> The height of the frame is always 240 mm higher than the door opening height.

(mm)

Example with door opening height 2000 mm.

## DOOR OPENING HEIGHT

The actual height of the door is 40 mm higher since a plate that covers the joint between the door and the frame is mounted on the door. For door opening height 2000 mm the actual door height is 2040 mm.

## DOOR FRAME

A door frame is always delivered with the door. The size of the frame depends on the platform size and the door opening width and height. The height of the frame is always 240 mm higher than the door opening height.

Door opening height	Frame height
1800	2040
1900	2140
2000	2240
2100	2340

A/C -side

Platform side	Frame size
900	1060
1000	1160
1100	1260

B -side

Platform side	Frame size
1040	1060
1280	1300
1480	1500
1580	1600
1980	2000

(mm)

Examples of possible displacement of door on B-side (door opening 900 mm) :

## DISPLACEMENT OF DOOR ON B-SIDE

If it is not possible to fit the door on the B-side in the standard location, it is possible to place the door to the left or to the right. Large glass door and half height doors can be displaced. It is not possible to displace EI60 fire & smoke proof doors or double hinged glass doors.

Door opening 900 mm (large glass door and half height door):

Platform size on B-side	Frame size	Standard frame	Displaced to the left	Displaced to the right
1280	1300	200/200	130/270	270/130
1480	1500	300/300	130/470	470/130
1580	1600	350/350	130/570	570/130

Only for large glass door with door opening height 2000 mm. (mm)

## EI60 - FIRE & SMOKE PROOF DOOR

EI60 - Fire & smoke proof door complies with the lift directive and EN 81-58. As standard the EI60 door is delivered with a frame. As an option a widening panel for the A and C side can be ordered to cover the machine side part. The widening panel is available with or without a hatch to cover the electrical cabinet.

**Opening width:** 800, 900 mm

**Opening height:** 1800, 1900, 2000, 2100 mm

The actual height of the door is 20 mm higher since a plate that covers the joint between the door and the frame is mounted on the door.

Installation: Not in combination with half height door.

**Standard:** Door blade and door frame in RAL 9016 (Traffic white), Glass window in clear glass (JT0). Aluminum door glass profiles.

**Options:** Door blade and /or door frame in other RAL color.

Note that the profiles around the glass window are in aluminum and are not painted in the same color as the door.

Door opening width	Door opening height	Available for B-side measure	Available for A/C-side measure
800	1800 / 1900 2000 / 2100	1040	900
900	1800 / 1900 2000 / 2100	1280 / 1480 1580	1000 1100

(mm)

## EI60 - FIRE & SMOKE PROOF DOOR FRAME

A door frame is always delivered with the door. The size of the frame depends on platform size and the door opening width and height. The height of the frame is always 220 mm higher than the door opening height.

Door opening height	Frame height
1900	2120
2000	2220
2100	2320

(mm)

B-side

Platform side	Frame size
1040	1060
1280	1300
1480	1500

(mm)

Note: For B-side 1580 mm and 1980 mm fire doors are not available.

A/C-side

Platform side	Frame size
900	1060
1000	1160
1100	1260

(mm)

## WIDENING PANEL FOR A AND C SIDE

As an option a widening panel for the A- and C-side can be ordered to cover the machine side part. The widening panel is available with or without a hatch for the electrical cabinet. The widening panel is available for door opening height 1800, 1900, 2000 and 2100 mm and has the same height as the door frame.

# DOOR CONTROL

The door control is either placed on the door frame of each landing door and/or placed away from the lift as an external control.

## DOOR CONTROL ON DOOR FRAME

Door control placed on the door frame on the lift. For Aritco HomeLift Access there is always place on the door frame for a door faceplate (except when having double hinged glass doors).

## CALL BUTTON

The call button comes with a background lit frame which indicates the status of the lift.

- Green light indicates that the lift is at your floor. Lit only on the floor where the platform is at the moment.
- Red light indicates that the lift is occupied. It is busy and you can't call for it.
- The flashing light indicates that the security circuit is broken, e.g. that the emergency button is pressed, the door is open on another floor for more than one minute, the door is blocked or the safety frame is pressed down. The flashing light can also be activated by a sum alarm, more information is then available in the service memory.

The same type of call button is used when the door control is placed on the door frame, externally or as a radio controlled call button.

## DOOR FACEPLATE

The door faceplate can be placed directly on the door frame or externally in an external call station box. The door faceplate is painted in the same color as the door frame. Standard color is RAL 9016 (Traffic white), if the door frame is painted in another color the faceplate will be painted in the same color.

The door faceplate can hold:

- Call button
- Key switch Telemecanique / School locking
- Key switch prepared for Assa / School locking
- Key switch prepared for EUR / School locking

## KEY SWITCH / SCHOOL LOCKING

Instead of having a normal call button on the door faceplate you can have a key switch. You then need to have the key to be able to call for the lift and to access the lift. Includes school locking function which automatically locks the door 10 seconds after it is closed. Aritco can provide one key switch per door.

Three brands to choose from:

- ASSA (Nordic markets only). Aritco only delivers the housing, Aritco does not deliver the locking cylinder.
- EUR, Aritco only delivers the housing. Aritco does not deliver the locking cylinder.
- Telemecanique

## EXTERNAL DOOR CONTROL - PLACED AWAY FROM LIFT

Door control placed away from the lift in an external call station box connected to the lift via a cable or as a radio controlled call button without any cable. Note that for double hinged glass doors there is no place for door control in the door frame. External door control must be used.

## RADIO CONTROLLED CALL BUTTON

The radio controlled button, placed in a white plastic box, gives the customer the freedom to place the call button wherever they would like within 10 meters from the lift. The radio controlled call button runs on batteries and provides remote controlled access to the lift. The radio controlled call button doesn't indicate the status of the lift. Can be ordered as an option.

## EXTERNAL CALL STATION BOX

The door faceplate can be placed away from the lift and will then be placed in an external call station box. The color of the external call station box is RAL 9016 (Traffic white). The box can either be mounted exterior on a wall (wall mount) or in the wall so that you only see the door faceplate (flush mounted). The external call station box can be ordered as an option. The standard length of the cable delivered with the external call station box is 1.5 m, as an option it can be 10 m long.

Size flush mount: 82x150x50 mm

Size wall mount: 95x185x50 mm

# DOOR MACHINERY

The landing doors are always delivered with either a door opener or a door closer.

Depending on the door type you can either have it mounted internally (in the door frame so that you can't see it from the outside) or externally (in a box visible from the outside).

- Door opener:** Opens and closes the door automatically. Door open time and the opening speed are adjustable.
- Door closer:** Door is opened manually. The door is closed automatically.

All openers and closers are available for both left and right hinged doors. When having two doors on the same landing, both doors will be opened at the same time when having door openers.

Door type	Internal door closer	Internal door opener	External door opener	External door opener FAAC
Large glass door Standard	•	•	•	•
Half height glass door	•	•	•	
EI60 – fire & smoke proof door	•		•	•
Outdoor lifts	•		•	•
Double hinged glass door		•	•	•

### INTERNAL DOOR CLOSER

Closes the door automatically. It is built into the door frame and is invisible from the outside. Includes function to keep door open until the user manually closes the door. Standard for large glass door, half height door and EI60 door.

### INTERNAL DOOR OPENER

Opens and closes the door automatically. It is built into the door frame and can't be seen from the outside. Can be ordered as an option. Standard for double hinged glass doors.

### EXTERNAL DOOR OPENER

Opens and closes the door automatically after a preset time. Can be ordered as option. Cover and sides painted in RAL 9016 (Traffic white) as standard. If the door blade is painted in another color, the cover will be painted in the same color. The sides will still be in RAL 9016 (Traffic white).

### EXTERNAL DOOR OPENER FAAC

Opens and closes the door automatically after a preset time. Suitable for tougher home environments, outdoor lifts and heavy use. For both indoor and outdoor installations. The opener is installed on the door frame which makes it suitable for installations where space is limited and when lift door opens up close to a wall. Smart logic makes it possible to program the speed and force, depending on door type. If an obstacle is detected, the door re-opens immediately. Then it closes, checking, at reduced speed, that the obstacle is no longer present. Cover in aluminum and sides in grey plastic. Can be ordered as option.

# DOOR OPTIONS

## DOOR HANDLE

Door handles casted in zinc standard painted in grey, anodic Natura, that looks like luminum. For lifts ordered with door blades in standard color RAL 9016 (Traffic white) it is possible to order the door handles in the same color as an option. Both the grey and white door handles will have a glossy surface to protect them from wear and tear and from getting dirty.

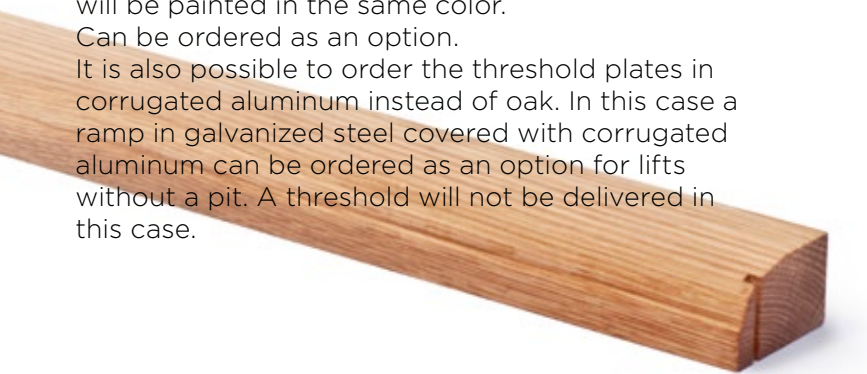

**Anodic Natura**  
(Aluminum look)

**Traffic white**  
(RAL 9016)

## THRESHOLD AND RAMP

For all lifts without a pit a door threshold in oak is delivered with the lift. A ramp can be delivered together with the door threshold for easier access to the lift. The ramp is made of galvanized steel, painted in RAL 9016 (Traffic white) as standard. If the shaft is painted in another RAL color the ramp will be painted in the same color. Can be ordered as an option.

It is also possible to order the threshold plates in corrugated aluminum instead of oak. In this case a ramp in galvanized steel covered with corrugated aluminum can be ordered as an option for lifts without a pit. A threshold will not be delivered in this case.

## COVER PLATE

If the door control is placed externally and not on the door frame a cover plate that covers the hole in the door frame is delivered with the lift. The cover plate is always delivered with the lift in the same color as the door frame. Standard color is RAL 9016 (Traffic white).

## LANDING INDICATOR ON DOOR

Digital display positioned at the door frame. It shows which floor the lift is on at the moment. The landing indicator can also show following system information:

- Warning if the lift batteries are low.
- A bell when the alarm button has been pressed.
- Number of starts and total run time since installation or since last reset.
- A weight symbol will appear if the lift is overloaded.
- If connected to the buildings fire alarm a "Fire" symbol will be shown when alarm is activated.

## ARRIVAL GONG

The arrival gong gives an audible signal (ding dong) when the platform arrives at each landing. It is placed in the door frame on each landing. Can be ordered as an option.

# LIFT WALLS

The lift is always delivered with a self supporting shaft.

The lift always comes with cladding panels on the inside of the shaft on the machine side. If the lift is not installed against a wall, machine side cladding can be added on the outside of the lift to cover the machine side. For all sides except for the machine side you can choose to have shaft panels in steel or glass. The top height of the shaft for Aritco HomeLift Access is not fixed. When having a standard door on the top floor, the minimum top height depends on the door opening height and the frame height. For a door opening height of 2000 mm the standard frame height is 2 240 mm, which is the lowest top height. Higher top height can be ordered. Maximum top height is 4000 mm.

### CLADDING PANELS

Cladding panels covering the inside of the machine side are delivered as standard. As standard the panels are in RAL 9016 (Traffic white), but if the shaft is painted in another color the panels will be painted in the same color.

### MACHINE SIDE CLADDING

The machine side cladding in steel covers the backside of the machine side if the lift is not installed against a wall. The machine side cladding can be ordered as an option and can run from bottom to top height. It can also be ordered partly if the lift is partly mounted to a wall. The cladding is painted in same color as shaft panels. Size: Travel height plus top height.

### GLASS

As an option glass panels with laminated and toughened glass can be ordered. Standard is clear glass (JT0). Option with tinted (JT16). See page 17. The glass panels are 8 or 10 mm thick depending on the size of the glass. Glasses which are higher than 1000 mm are always 10 mm. The glasses are fitted in aluminum profiles. These profiles are in aluminum as standard, but can be painted in a RAL color as an option. For a shaft painted in the RAL 9016 (Traffic white) the profiles can be painted in the same color. For a shaft painted in another RAL color the profiles are as standard aluminum. As an option the profiles can be painted in the same RAL color. Note that this has to be ordered separately.

### INNER CEILING

For a closed shaft you can add an inner ceiling as an option. The inner ceiling is painted in RAL 9016 (Traffic white) as standard, but will be painted in the same color as the shaft if the shaft is painted in another color. It comes with built-in LED light which complies with LUX regulation.

### SHAFT PANELS

Standard is 25 mm thick shaft panels with EPS (polystyrene) core and steel plates. The panels are painted in RAL 9016 (Traffic white) as standard. If the shaft is painted in another color the shaft panels will be painted in the same color. The height of the shaft panel is 575 mm. As an option the shaft panels can be ordered with a core of rockwool instead of EPS.

Shaft panels / glass with aluminum profile:

Height (mm)	Clear glass (JT0)	Tinted glass (JT16)
736	•	•
1472	•	•
2208	•	•
Customized <sup>1)</sup>	•	•

<sup>1)</sup> Additional cost per mm. Maximum height per glass panel is 2200 mm

# LIFT WALL OPTIONS

## MAST

Aritco HomeLift  
Access is always  
delivered in parts.

## SHAFT SUPPORT BRACKET / L-BRACKET

Installed to stabilize the shaft when it is not mounted against a wall. One shaft support bracket shall be used per floor, except the bottom floor. The shaft support bracket/L-bracket is fixed to the lift on the machine side and in the building on A/C-side (under door). Not possible to fix on B-side. The shaft support bracket /L-bracket is painted in RAL 9016 (Traffic white) as standard. If the shaft is painted in another color the shaft support bracket is painted in the same color. The shaft support bracket / L-bracket is available for platform sizes 1040, 1280, 1480, 1580 and 1980 mm.

## ELECTRICAL CABINET

The standard position of the electrical cabinet is in the shaft, at the upper floor where the landing door is located. If the standard position of the electrical cabinet proves difficult Aritco offer the option to move it to another landing or to place it externally in a lockable casing. For platform size 900x1040 mm the electrical cabinet is mounted behind the platform panel in the top of the shaft. When ordering a full height wall for platform 900x1040 mm, the electrical cabinet must be external. Size of standard electrical cabinet (placed in shaft): 180 x 880 mm. Size of external electrical cabinet (placed in an external box): Height 500 mm, depth: 160 mm, width: 400 mm.

## EXTERNAL SERVICE PANEL

A service panel is always placed in the electrical cabinet. It is used to run tests etc., and for emergency running the lift. An external service panel is available for mounting outside the lift as an option. In this case a wire connects it with the service panel in the electrical cabinet. For platform size 900 x 1040 the electrical cabinet and the standard service panel is mounted in the top part of the shaft and can't be reached from outside. Therefore it is connected to an external service panel (wall mount) which is mounted in a faceplate box. The external service panel must be activated with a 3 edge key before it can be used. Size: 95 x 185 mm

## EXTRA ANTI-RUST PROTECTION

In order to protect the lift when exposed to humid environments, e.g. when sea transport or when the packed lift is exposed to humid conditions during transport or at the installation site, the lift is delivered with guide rails in corrosion class C5. Can be ordered as an option.

# COMMUNICATION

Two way communication is mandatory according to EN81-41. Choose from one of the following options or install your own phone.

## PHONE

The telephone works as a standard telephone but is intended for emergency calls. The phone is mounted on the platform panel. Equipped with redial memory, mute button and a lamp indicator for on/off. Can be equipped with a GSM module. Aritco does not supply SIM card.

## AUTODIALER

Equipment for emergency calls. Integrated on the control panel. Dials automatically when the alarm button is pressed. When unanswered after a predefined time, the call is automatically forwarded to the next number.

The autodialer can be equipped with a GSM module (only 2G). Aritco does not supply SIM card.

# DRIVE SYSTEM

## BATTERY GUARD

The battery guard ensures that the batteries are not damaged and that there is enough power so that you can run the lift in the case where the power to the lift is cut. It ensures that the lift is turned off (all power consumers are turned off) when the voltage of the batteries reaches below 22 V. This means that even if the power on site is turned off the batteries in the lift will not be discharged and you can still run the lift. The battery guard can be ordered as an option.

## PHASE SEQUENCE RELAY

Extra protection to secure that the lift does not run in the wrong direction when the phases are connected incorrectly. Option introduced for 3-phase lifts.

## SOFT START

For Aritco HomeLift Access, 3-phase lifts, without frequency control, soft start is standard. It gives a smoother start when a destination button is pressed and the lift starts.

## BATTERY OPERATED EMERGENCY LOWERING

All Aritco lifts have battery operated emergency lowering as standard. You can lower yourself from inside the lift and get out by yourself when there is a power failure. Possible to run the lift to nearest level from the platform (possible to go down) - Executed when pressing a platform button. Can also be run externally from the call button (hold to run) or service box.

## POWER SUPPLY

For Aritco HomeLift Access you have the following options:

### 3-phase 400V 5.2 A / 16 A slow

- Standard for all lifts (50 Hz)
- Frequency 50 or 60 Hz
- Frequency converter, with built-in soft start and stop (option).

### 1-phase 230V 16 A / 16 A slow

- Option when building doesn't support 400V 3-phase
- Frequency converter, with built-in soft start and stop
- Frequency 50 or 60 Hz

### 3-phase 230V 9 A / 16 A slow

- Option
- Note that this is rarely used except for example in Norway and Saudi Arabia
- Frequency 50 or 60 Hz

## LUBRICATION

The screw must be oiled at regular intervals.

**Manual Lubrication:** A brush fixed to the platform oils the screw when using the lift (a tray with lubrication oil in the bottom of the shaft). Standard for Aritco HomeLift Access.

**Automatic Lubrication:** Oils the driving screw at regulated time intervals even if the lift is not in use. The lubrication frequency is adjustable. Option for Aritco HomeLift Access. Standard for lifts with a travel height of over 8000 mm. Recommended for lifts that are seldom used or that are not used regularly to travel from ground to top floor.

# OUTDOOR VERSION

Aritco HomeLift Access Outdoor lift is designed for outdoor use. All outdoor lifts are delivered with guide rails in corrosion class C5.

The outdoor version consists of different options that enable an outdoor installation. Depending on the installation environment different options must be added and the installation conditions that are specified must be followed.

## VENTILATION FANS

Ventilation fans mounted in top of the shaft. Two axial fans 230 V, 12 W. The fans are connected to an external power socket, 230 V. The fans are mandatory for outdoor lifts.

## ROOF

Roof for outdoor version. If the lift is not installed in an external shaft an outer roof must be used. One roof corner is left open for water outlet. The roof is made of galvanized steel and painted in RAL 9016 (Traffic white) as standard. An inner ceiling with light must be ordered for outdoor lifts when ordering a roof.

## DOOR CANOPY

A sloping roof placed above the landing doors to protect them from rain and snow etc. The door canopy is made of galvanized steel and painted in RAL 9016 (Traffic white) as standard. Width: 1160 mm, Slope angle: 23°

## HEATER

A heater placed in the bottom of the shaft is recommended for cold climates. Can be ordered as an option. The heater of 2000 W must be connected to an external power socket. Note that for colder climates than -5° the lift must be installed in an external heated shaft.

# FIXING THE LIFT

## Fixing the lift to the walls of the house.

Details regarding the forces are available in the installation manual for Aritco HomeLift Access. Make sure that the entire installation is made in an indoor environment.

### Reaction forces from the lift to the building:

Maximum force as a function of the lift's travel. The force is distributed to the floor through the mast bottom within the area "A" and to the shaft bottom within the area "B".

### Force on fixing to support frame (mast) to wall:

- c - c = distance (height) from the floor to the highest fixing into the wall.
- The maximum distance between two fixings or lower floor and the lowest fixing is 4,0 m. For outdoor lifts maximum distance is 3 m.
- The minimum distance between lower floor and the highest fixing is 2,0 m.
- c - t = distance from the top of the mast to the highest fixing into the wall.
- The maximum distance between the top of the mast and highest fixing is 1,2 m

For exact details for installation see site preparation manual.

---

# EUROPEAN STANDARDS AND SAFETY

Aritco HomeLift Access comply with the Machine Directive 2006/42/EC, by following the harmonized standard EN 81-41. The lifts are also compliant with the Electromagnetic compatibility (EMC) – and Low voltage directive. The lifts are type approved and CE marked. EI60 – Fire & smoke proof door complies with the lift directive and EN 81-58. A certificate for respective lift is available on Aritco Cloud.

---

# RECOMMENDED SALES ARGUMENTS

### EASY INSTALLATION

Means that the lift is both easy and fast to install. A normal installation only takes two days.

### MINIMUM BUILDERS WORK AND SMALL FOOTPRINT

The lift can be installed without a pit, with a ramp (or with a 50 mm pit without ramp). All parts are included in the shaft - no extra machine room or head room needed.

### LOW ENERGY CONSUMPTION

Minimum stand-by power consumption 15 W – not more than a computer or a TV. Energy class A as per VDI 4707.

### ENVIRONMENTAL PRODUCT DECLARATION

Aritco is the first lift manufacturer with an Environmental Product Declaration. More than 95% of the parts are recyclable.

### LOW OPERATION AND MAINTENANCE COST

Lowest on the market.

### NO HYDRAULICS, WHICH MEAN NO LEAKAGE OR SMELL

No additional space needed for hydraulic unit.

### ROBUST SHAFT

25 mm shaft panels. Robust and resistant to damage. Good noise and acoustical isolation.

### SMARTSAFETY SYSTEM

Lift is designed with reliability and safety in focus; to meet all kinds of situations that can occur in a home, as well as to prevent accidents. All these safety features are included in the Smart-Safety System. The lift contributes and helps you to create a home that is safe and accessible for anyone ;

- **Screw and nut drive system:** The self-sustaining concept, i.e. the friction between screw and nut will prevent the lift from falling down. No additional brake system is needed.
- **Power failure operation:** If there is a power failure, you can always get out of the lift by yourself with battery operated emergency lowering. Use the platform buttons and the lift will take you to the closest lower floor and you can open the door and get out by yourself.
- **Emergency calls and emergency operation:** If you are trapped in the lift you can make emergency calls from a phone. It is also possible to lower the lift and get out of the lift
- **Safety edges:** Safety edges around the platform and the platform wall will prevent something to get trapped between the moving platform and the shaft/walls.
- **Locking of lift:** Key switch lock on the platform or the call station that prohibits unauthorized use of the lift.
